1. This is a first Office action on the merits for application serial number 10/669900 filed 09/25/03 as a continuation of application serial number 10/244842. Claims 1 and 4 are pending. Claims 2 and 3 have been canceled by preliminary amendment.

2. The examiner acknowledges receipt of the IDS received 09/25/03. An initialed copy of the list of references is attached.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 2,497,957 to Pelley.

Pelley provides a transparent panel 15 having an external surface (considered the right hand side of figure 2) which is larger than an internal surface (considered the left hand side of figure 2). Figure 2 shows respective external and internal peripheral edges 23, 21. The underside of a peripheral flange of the external surface comes in abutting contact via a sealing strip 22 against the external surface of an opening provided in element 5. An external frame assembly 25 is mounted around the external peripheral edge 23 to mount the transparent panel 15 to the opening in element 5.

Art Unit: 3635

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,698,145.

Although the conflicting claims are not identical, they are not patentably distinct from each other because each of the elements of the instant claim are included in the patented claim.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
